Merhan Mahmoud

AI Eng

6th of October, Egypt 01027733713 merhanmahmoud90@gmail.com LinkedIn

A motivated AI enthusiast with a strong foundation in machine learning, data analysis, and programming, proficient in Python and TensorFlow. Gained practical experience through academic projects and internships, quick to learn, and a collaborative team player dedicated to professional growth and contributing to AI innovations.

EDUCATION

B.Sc. in Bio Artificial Intelligence

Sep 2020 - Jun 2024

- Faculty of Artificial Intelligence, Kafr El-Sheikh University.
- GPA: 3.87

Master's Degree in Artificial Intelligence (In Progress)

WORK EXPERIENCE

Coding Instructor

iSchool | Jun2024-Aug2024

- Taught coding and programming concepts to students, focusing on Python and other
- relevant technologies.
- Provided hands-on guidance during coding projects, helping students apply their skills in
- practical scenarios.
- Collaborated with other instructors to create a positive and productive remote learning
- environment.
- Developed and implemented lesson plans that catered to various learning levels, ensuring
- student engagement and comprehension.

COURSES

AI Training Program

British University in Egypt (BUE) | Feb 2025

- The training covered AI fundamentals, data management, and ethical considerations. It
- included supervised and unsupervised learning, reinforcement learning, generative AI, and
- large language models (LLMs).

Data Analysis

Digital Egypt Youth (DEY)- Creativa Innovation Hubs | Dec 2024

- learned data collection and cleaning, statistical analysis, data visualization, and how to use tools like Excel, power BI and Tableau, while also gaining freelancing and project management skills.

AI SummerTraining

National Telecommunication Institute (NTI) | Jul 2023

- Completed an online training program in Artificial Intelligence, focusing on machine learning, data analysis, and AI model development.

PROJECTS

ECG Device

- create a portable ECG device capable of capturing accurate heart signals for medical diagnostics using Arduino, Sensors, Python.

Heart Disease Prediction

- *create a predictive model that can accurately assess the risk of heart disease using patient medical data with Python, Keras, TensorFlow, Pandas, NumPy.*

Advanced MRI Sequence Generation using GANs for Optimized Brain Tumor Segmentation

- *Leveraged GANs to generate complete MRI sequences from a single input sequence focused on transforming one of seq to T1ce to avoid the injection of gadolinium, which is dangerous in some cases, and to reduce the time and high cost, advanced segmentation techniques are used to isolate and visualize tumor in 3D, identifying the different parts of the tumor to enhance diagnosis and treatment planning. Published in Sada Elbalad and Elwatan*

SKILLS

- Programming Languages: Python, C++, C
- Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV
- Machine Learning & AI: Supervised Learning, Unsupervised Learning, Reinforcement Learning, Deep Learning, Neural Networks
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau

ACTIVITIES

Startup Olympics - Third Place
Kafr El-Sheikh, Egypt | Jul 2024

- Worked collaboratively, which led to our success in a highly competitive environment, achieving third place.

Attendee, Techne Summit
Alexandria, Egypt | Nov 2022

- Attended sessions focused on technology, entrepreneurship, and innovation. Engaged with industry professionals and explored the latest advancements in AI and tech trends.

CERTIFICATES

- DataManagement and Visualization
- InnovEgypt
- NTI
- Ischool
- Honoring outstanding students
- Data Anaysis
